### System Sizing Kit for Closed Loop Systems

Use this kit to determine volume capacities for either hot or cold closed loop systems. System sizing compound is not detrimental to the system and can be left in the system for any length of time.

Kit includes:

- ▶ Container of System Sizing Compound
- ▶ Empty "Before" sample bottle.
- ▶ Empty "After" sample bottle.
- ▶ Sturdy cardboard box for return of sample bottles.
- ▶ Postage paid label for return.

**Note:** Shape of Sizing Compound bottle may vary, however quantity included remains the same.
