

UNITED
LABORATORIES

If you've got
dirt that's
too grimy,
greasy, and
built up
for ordinary
cleaners,
send in
SAMSON.

SAMSON is the powerhouse, industrial strength aerosol that cuts through the tough dirt and soils that the other stuff won't touch.

- Thick, clinging jel clings to vertical surfaces to maximize contact time.
- Powerful surfactants and detergents penetrate and break-up caked on soils.
- Potent formula digs deep into porous surfaces to infiltrate layer after layer of grime.
- Ideal for rehab cleaning.
- Upside-down fan nozzle covers wide areas quickly.

Use **SAMSON** throughout your facility....

- Tile and grout
- Cinderblock walls
- Brick
- Chimneys and fireplaces
- Machinery and equipment
- Diamond plate
- Plastic
- Stairs
- Garbage cans and chutes
- Hard-to-reach corners and edges
