

NPE – A Dangerous and Destructive Path!

Don't buy cheap products that contain NPE (Nonylphenol Ethoxylates). ***YOUR HEALTH DEPENDS ON IT.*** NPE is classified by the EPA as a known toxin that disrupts the endocrine system in fish and humans.

Numerous studies show that NPE can affect the following:

- Fish develop both male and female sex organs.
- Increases mortality.
- Damages the liver and kidneys.
- Decreases testicular growth.
- Decreases sperm and testosterone levels in male fish.
- Disrupts normal male to female sex ratios in populations.
- Affects metabolism development.
- Affects growth and reproduction.
- Cause of breast cancer.

How can you be safe?

Check your product MSDS information for the following CAS numbers. If your product has any of these numbers, it contains Nonylphenol or Nonylphenol Ethoxylate.

104-35-8	9016-45-9	27176-93-8	37205-87-1	68412-54-4
104-40-5	20427-84-3	27177-05-5	37340-60-6	84852-15-3
7251-69-7	25154-52-3	27986-36-3	51938-25-1	127087-87-0
7311-27-5	26027-38-3	28679-13-2	68412-53-3	

Keep yourself, your employees and others safe by only using products that are NPE-Free.

United Laboratories' product line is 100% NPE-Free.
