To whom it may concern,

After much debate with your sales representative Kris Cody, I ordered your product 2001 for asphalt and tar removal. This division of Roadtec is to refurbish used asphaltting equipment, and we had never found anything, excluding diesel fuel that would remove tar and asphalt from our machinery.

Kris convinced me that this product was not only equivalent to diesel fuel, but, to my surprise, was both organic and economical to use. The 2001 is easy to use, you simply spray the product on, then spray it off with water after only a few minutes. She advised that water would kill the 2001 the same as the 2001 kills the asphalt and tar, she was not kidding.

My clean up crews swear by this product, and I have no problem whatsoever in recommending this product to all of our customers to use when they are in the field. The product does no damage that we can find to any of the minute parts used on our equipment.

Thank you for having this product so readily available for our use.

Sincerely,

A handwritten signature in black ink that reads 'Hollis A. Lamons'. The signature is written in a cursive style with a long horizontal line extending to the right.

Dear Ms. Benson,

We have received and reviewed your new product submittal, Harvest Gold, for use as cleaning compounds.

After review of the information that you have submitted, and laboratory testing, we are approving your product, Harvest Gold, as an asphalt/tar removers. This product will be added to our Qualified List for Qualified Cleaning Compounds, FS-2060 Table 1.

Approval of your product is contingent upon continued compliance with the specification and satisfactory field performance.

If you have any questions feel free to give me a call at 573-526-4351.

We appreciate your interest in working with MoDOT.

Sincerely,

Jeffery S. Joens
Senior Materials Specialist
