SEASONAL

EQUIPMENT WAX

SEASONAL EQUIPMENT WAX provides a slick, non-stick coating, offering superior release action to protect metal, fiberglass, painted and plastic finishes on your equipment.

In Winter, maximize the efficiency of your plows and shovels:

- Prevents even the wettest snow from sticking to surfaces.
- Works in cold temperatures.
- Helps prevent corrosion to equipment from rock salt and water.
- Great for road signs – prevents snow from sticking to face of signs so they remain readable.

In Spring, Summer and Fall, maximize the efficiency of lawn mowers, weed whackers, trimmers and more:

- A quick spray coating prevents grass and clippings from sticking to surfaces.
- Reduces drag and increases equipment efficiency.
- Protects surfaces for corrosion caused by fertilizers, other lawn care treatments and water.
- Makes equipment clean-up a breeze.

Use **SEASONAL EQUIPMENT WAX** for these applications and so much more to protect your equipment all year round.
