

Responsible Innovation™

An All Natural Insecticide that is Healthy for You to Breathe

BIO BRIGADE

FRESH AIR™

Insecticide

BIO BRIGADE FRESH AIR™:

- Contains All Natural, Food Grade Ingredients
- Safe to Humans
- VOC-free
- Bio-based from Renewable Resources
- Asthmagen-free per AOEC Definition
- Earth Smart® Certified
- Kills Bugs on Contact
- Residual Action Provides Continued Protection

While many insecticides may create allergic or breathing issues for people in areas of application, **FRESH AIR™** can actually work to improve the air with proven benefits of peppermint oil. The active in this formula, peppermint oil, has long been used to provide relief of respiratory problems and the fragrance is refreshing.

Peppermint Oil's Health Benefits:

- **Peppermint oil is a health aid when inhaled –**
Helps in clearing the respiratory tract. Works as an effective expectorant and therefore provides instantaneous, though temporary, relief in numerous respiratory problems including nasal congestion, sinusitis, asthma, bronchitis, cold and cough. When vapors are inhaled, peppermint oil removes nasal and respiratory congestion immediately.

When used in your facility, you can kill insects and the vapours from the peppermint oil will freshen the air.

Use FRESH AIR™ to control:

- Ants
- Beetles
- Centipedes
- Cockroaches
- Crickets
- Earwigs
- Fleas
- Fruit Flies
- Silverfish
- Spiders
- Midge Flies
- Ticks and more.

BIO BRIGADE FRESH AIR™ can be used indoors or out to fight against crawling insects; in drains to control fruit flies; or at wastewater plants to control midge flies. With its peppermint scent, no one will realize you've sprayed an insecticide.

BIO BRIGADE FRESH AIR™ qualifies for exemption from EPA registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA).
