

United 312 **BOILERMATE**

Synthetic Polymer Liquid Steam Boiler Treatment

United 419 **BOILERMATE PLUS**

**Synthetic Polymer Liquid Steam Boiler Treatment
Plus Condensate Line Treatment**

**Keep your Entire Steam Boiler System Operating Cleanly and
Efficiently with Boilermate or Boilermate Plus**

Both formulas provide:

- **Sulfite.** Controls dissolved oxygen and prevents pitting.
- **Synthetic polymers.** Coat particle surface to prevent scale from adhering and cohering.
- **Focculants.** Condition sludge for easy removal by blowdown.
- **Sequestrants.** Control hardness and prevent scale.

In addition, United 419 BOILERMATE PLUS contains Volatile Amines to prevent steam line, steam trap and condensate return line corrosion.

United 312 BOILERMATE is recommended for systems where steam performs a secondary function such as direct humidification, food processing and health club steam rooms.

United Laboratories' Boiler and Cooling Tower Products are backed up by over 50 years of expertise including:

- **On-site assessment by well-trained, professional representatives.**
- **Water testing.**
