Rust Converter and Primer Coat

ONE STEP
Rust Converter
And Primer Coating

Bonds With Rust...Cures Hard As Cement

- Converts rust to phosphates instantly...no scraping, no sandblasting.
- Water base product: Can be applied to a damp surface. Does not trap moisture.
- Expands and contracts with the metal; in lab tests, withstood 300°F for 90 days without cracking or peeling.
- Contains no oily solvents or resins, can be diluted with water.
- Covers 530 to 1000 Sq. Ft. per gal.
- Less than 1 % V.O.C.s. Contains no lead or heavy metals.
- Accepts a wide range of top coatings...oil base, water base, enamels, urethanes, etc.
- Hydrogen Sulfide resistant. Tools clean up with water.
