

UNITED

LABORATORIES

Get Buildings, Statues, Fountains, Cemetery Markers and Sidewalks Like-New Clean....

- Wash away dirt, black algae, oils, fuel residue, smoke... most environmental soils.
- Ideal for most surfaces including concrete, aluminum, tin, marble, granite, vinyl, brass, plastic and fiberglass.
- Enzymes catalyze naturally-occurring bacteria to speed cleaning process.
- Versatile concentrate can be used with pressure washing, steam cleaning, or bucket-and-brush operations.

...With NO Environmental or Safety Hazards.

- Earth Smart® formula has no hazardous components, no VOCs, ranked zero in all HMIS categories.
- Patented Separation Technology enhances operation of water clarifiers, oily-water separators and other recirculating systems.
- Non-toxic formula. Runoff will not damage grass, shrubs, flowers or other plants.
- No phosphates.
- Non-acid...Safe for workers. No splashback concerns.
- Contains no bleach.

DIRECTIONS:

Dilution rates should be determined based upon the soil level and the porosity of the surface. Below are basic guidelines:

For light-duty cleaning or for surfaces that are not porous such as aluminum, fiberglass and tin, dilution rates may be as high as 64:1.

For medium-duty cleaning or surfaces that are somewhat porous such as concrete, use a 32:1 concentration.

For heavy-duty cleaning—especially when surfaces are encrusted with black algae—and for highly-porous surfaces such as brick, granite and marble, use a 5:1 dilution.

SUGGESTIONS FOR USE WITH EQUIPMENT:

Like the dilution rate, the cleaning method should be determined based upon the soil level and the porosity of the surface.

Cleaning effectiveness is affected by **Temperature, Agitation, Concentration and Time (TACT)**. Adjust each to maximize your cleaning process.

As a general process, spray the surface with the **WEATHER-ZYME** solution and allow it to remain on the surface. For light soil, a few minutes contact time is all that is needed before rinsing. Agitation will quicken the cleaning process.

For heavy soil including black algae, generously spray the solution directly on the surface and allow several days contact. Over time, the enzymes will catalyze the natural bacteria to digest the organic soils that discolor the surface. Rinsing is not required, but may speed up cleaning by loosening soils.

FIRST AID MEASURES:

EYE CONTACT: Rinse immediately with large amounts of water for several minutes. Remove contact lenses, if present and easy to do so. Continue rinsing. If irritation or other symptoms persist, seek medical attention.

SKIN CONTACT: Wash with soap and plenty of water. If irritation persists, call a physician or poison center.

INHALATION: Remove to fresh air. If irritation persists, call a physician or poison center.

INGESTION: Do not induce vomiting, unless directed by medical personnel. Get immediate medical attention.

An SDS for this product is available through United's website, www.unitedlabsinc.com, providing 24 hour access. Please read the SDS carefully and follow all directions when using or handling this product. Never reuse empty containers. Incompatible materials may adversely react.
